

# Legal & Regulatory Expert Services

**TIPRA, LLC** delivers legal & regulatory expert services to law firms and corporations that seek objective testimonial and consulting expert witnesses in specialized technology matters.

Drawing its experts from a global network of highly-educated and experienced technology professionals, TIPRA is able to provide legal expert services along with a wide array of advisory services where deep technical acumen in the context of global business situations is required. TIPRA differentiates itself from other expert witness sourcing firms by the highly selective nature of our global expert network, which is strictly invitation-only and limited to the most accomplished and recognized professionals in their respective technology and industry domains.

## Legal Expert Services

TIPRA's legal & regulatory practice specializes in matters that involve complex technology issues and subject matter. The deep experience of our experts allows them to provide strategic direction to client practitioners and serve as authoritative witnesses and legal experts in complex legal disputes. Our experts are particularly adept at translating technical jargon and complex technical issues into easy-to-understand language and systematic considerations so that clients can understand the implications of all relevant technical issues.

TIPRA provides unique capabilities in patent litigation, IPR licensing and valuation, trade secret disputes, anti-trust & unfair competition claims, and other complex litigation matters involving specialized technical subject matter.

## Regulatory Services and Standards

TIPRA's global network of telecom experts has been particularly actively involved in regulatory work worldwide. Network members stationed in the US, UK, Australia, Japan, Singapore, and Hong Kong have a long history of working with the FCC in the US, with European agencies, and with Asian telecom regulators while in various leadership roles with the major telecom carriers. Other experts have participated in setting standards (e.g. high-speed computer interconnects and photonic packaging).

## The TIPRA Expert Network

The invitation-only TIPRA global network currently consists of over 60 technology professionals and experts in 17 countries. Each member has at least fifteen years of professional or academic experience in one of our designated primary technology domains, with industry-recognized accomplishments and top-tier academic credentials. Our members include industry executives, technology domain thought leaders, researchers, academics, attorneys, patent agents and consultants.

## TIPRA Primary Technical Domains

- Wireless & Mobility
- Semiconductors & Materials
- Optics & Photonics
- Computers & Software
- IP / Networking
